EXPERTISE

Python
C / C++
HTML, CSS, JavaScript
Arduino & Sensors
Chatbot Integration
Agentic AI

LANGUAGE

English
Malayalam
French

CERTIFICATIONS

CBSE Class X – 91% (2022)
Distinction in Maths & AI

CBSE Class XII – 94% (2024)
Distinction in all subjects

ACTIVITIES

Fitness Enthusiast
Arduino Workshop

Johaanoliju James

Computer Science & Engineering Student

Objective

Aspiring and energetic Computer Science student at Cochin University of Science and Technology, eager to dive into real-world tech projects. Passionate about blending code with creativity, especially in AI, electronics, and web development.

Education

B.Tech in Computer Science and Engineering 2024 – 2028
Cochin University of Science and Technology
• CGPA: 8.02 | Expected Graduation: 2028

Work Experience

Intern – IFIHomes 2-Week Internship
Arduino & Sensor-Based Technology

- Worked with Arduino microcontrollers and sensor-based systems in a professional setting.
- Gained hands-on experience integrating sensors for real-time data acquisition and automation.
- Collaborated with the team on embedded systems projects relevant to smart home technology.

Web Developer & Chatbot Integrator – CoverFirst.in 2026
Insurance Services Platform

- Designed and developed the full website for coverfirst.in, an insurance services platform.
- Integrated an AI-powered chatbot to assist users with queries and site navigation.
- Focused on user-friendly UI/UX and seamless chatbot-to-website communication.

Projects

AI Study Planner 2026
Agentic AI-Powered Study Scheduler

- Built an AI study planner that uses agentic AI to create personalized, efficient study plans.
- System autonomously adapts schedules based on user progress, deadlines, and learning patterns.
- Demonstrates practical use of AI agents for productivity and academic support.

ClipCraft 2026
Video & Content Creation Tool

- Developed ClipCraft, a tool to streamline content and clip creation workflows.
- Built with a focus on automation and efficiency for content creators.

Temperature & Humidity Monitoring 2025
Arduino + LM35 Sensor System

- Built a system using Arduino and the LM35 sensor to measure and display ambient temperature.
- Read analog data, converted to Celsius, and designed circuit and code for real-time monitoring.

Achievements

■ **Foundry Hackathon – 1st Place** 2026
ClipCraft – AI Video & Content Creation Tool

- Won 1st place at the Foundry Hackathon by building ClipCraft, an AI-powered tool designed to automate and streamline video clip and content creation workflows.
- Delivered a working prototype under hackathon conditions, demonstrating strong problem-solving, rapid development, and practical AI integration skills.
